

# LinkedIn Thought Leadership Agent

Solution Architecture & Workflow Reference

**Problem:** Senior leaders have deep expertise but lack time to consistently post thought leadership on LinkedIn.

**Solution:** 9-skill agentic pipeline that interviews, plans, drafts, refines, benchmarks, archives, and publishes a 6-week content series.

**Platform:** Claude Code / Manus AI

**Skill 0: Master Orchestrator**

Sequences all skills, maintains state (Strategic Intent + Roadmap + Drafts), enforces HITL gates, handles error recovery

## BENCHMARK METRICS (SKILL 6)

Actionability (1-5) • Voice Consistency (1-5) • Strategic Depth (1-5) • Narrative Cohesion (1-5) • LinkedIn Optimization (1-5)

## KEY DESIGN DECISIONS

Sequential pipeline with 2 HITL gates ensures quality without full automation risk. Skills are modular: swap Skill 4 for a different voice engine without changing the pipeline.

## TECH STACK
